

Vasari Plaster & Stucco offers 80 select colors. All colors are compared /matched to Benjamin Moore, Sherwin Williams, Pittsburgh and ICI fan deck swatches to help you make a perfect color choice. Digital representations will be different from the real color. The description next to some of the colors (darker, lighter, etc.) describes the closest chip on the particular fan deck compared to the actual color. So, if 'darker', the fan deck color is about 10%-20% darker but still very similar to our true color.

Depending on how applied, you will have different deeper and darker variations of the selected color. Deeper colors sometimes need full burnishing to achieve the full depth of color. Colors shown are the average tone of burnished / non-burnished finishes.

Tinting of wet plaster is free of charge with the exception of darker colors as marked by the asterisk (\*), which indicates that 5 gallon pails are an additional \$30 and 2 gallon pails are an additional \$20. Vasari can custom match almost any color to your specifications. Please contact us for custom color matches. We charge \$20 per 5 gallon pails and \$15 for 2 gallons for custom colors.

All Vasari tints are classified as zero volatile organic compounds (VOCs) and have no or minimal odor.
